

**BRAC Semi-annual Report
October 1, 2009 to March 31, 2010**

I. Site Name: Naval Station Treasure Island

EPA RPM:	Christine Katin	(415) 972-3112	katin.christine@epa.gov
State	Remedios Sunga	(510) 540-3840	rsunga@dtsc.ca.gov
RPMs:	Ross Steenson	(510) 622-2445	rsteenson@waterboards.ca.gov
DoD BEC:	James Sullivan	(619) 532-0966	james.b.sullivan2@navy.mil

II. Significant Issues:

a. Congressional:

There were no specific congressional inquiries to EPA for environmental investigations at Naval Station Treasure Island during this period.

b. High Profile Items:

The Secretary of Navy (Mr. Ray Mabus) and the Mayor of San Francisco (Gavin Newsom) reached an agreement in December 2009 on general terms to transfer Treasure Island. The Navy will prioritize cleanup activities with the BCT to enable transfer of some parcels by the end of this year.

c. Delays in Environmental Restoration Actions:

Site 12. In 2007, the Navy initiated a removal action (soil excavation) at Site 12 (Solid Waste Disposal Areas) primarily to address lead contamination. Radiological anomalies were detected in soil, which required the Navy to make changes to the risk assessment, characterize radiation, and dispose the material appropriately. Some radiation issues remain to be addressed, such as the potential for radiation beneath buildings (building demolition or institutional controls) and finalizing the risk assessment. The Remedial Investigation will begin upon completion of the removal action this year.

III. Issues Impacting Transfer:

None at this time – the Navy will prioritize cleanup to facilitate transfer of some parcels.

IV. Staffing/Funding Issues:

None at this time.

V. MOU Support Update:

Naval Station Treasure Island is not an NPL site.
